GSS school jamwaramgarh

SKILL

- HTML5
- React.js (v19)
- CSS3
- Tailwind CSS
- JavaScript (ES6+)
- Git & GitHub

PROJECT'S

Music Website -- [Live demo](#)

A responsive web application built using React.js and Tailwind CSS that allows users to browse and play music tracks directly in the browser. The app features a clean and interactive user interface, includes search functionality to quickly find songs or artists, and lets users add tracks to their favorites for easy access. It is designed to provide a seamless and enjoyable music experience with modern web technologies.

- Tech Stack: React.js, Tailwind CSS, HTML5, CSS3, JavaScript

Movie App -- [Live demo](#)

A responsive web application that lets users browse, search, and explore movie details. It integrates with a movie API to fetch real-time data and presents it through a clean, interactive, and user-friendly interface, optimized for both desktop and mobile devices.

- Integrated with a movie API to fetch real-time data and display ratings, release dates, and overviews.
- Tech Stack: React.js, HTML5, CSS3, Tailwind CSS, Axios (or Fetch API), React Hooks (useState, useEffect), Vercel

Modern Portfolio Website -- [Live demo](#)

I developed a modern and fully responsive personal portfolio website to showcase my skills, projects, and frontend development capabilities. The website is built using React.js and Tailwind CSS, featuring a clean UI, smooth animations, and a mobile-first design. It highlights my work, experience, and contact details in an organized and visually appealing layout. This project reflects my ability to create professional, user-friendly, and performance-optimized web interfaces.

- Built a fully responsive and modern React + Tailwind CSS portfolio website with reusable components, dynamic project rendering, smooth animations, custom UI elements, and optimized performance for fast loading.
- Implemented key frontend features including dark/light theme, scroll-based animations (AOS/Framer Motion), clean UI/UX design, and deployed the website on Vercel for secure, production-ready hosting.
